

THERAPEUTIC TOUCH

Level One Professional Training

Therapeutic Touch, a subtle energy system and powerful healing therapy, was developed in the mid 20th century by two professional women who were also healers, Delores Krieger PhD RN and Dora Kunz. It is founded on a synthesis of eastern and western thought and partially derived from the ancient tradition of Laying on of Hands.

Therapeutic Touch is both a profound technique used to facilitate healing for ourselves or another and a way of life offering deep and continuing insights for our individual journeys. It is based on the awareness that we are energetically connected to each other and to a greater whole, and that through this connection we can facilitate healing. It allows us to continually deepen our own healing & skill whether a beginner or experienced at our life's work.

Level I focuses on the theory and hands on practice of the work. Expand your sensitivity and awareness, explore new levels of grounding, stillness, listening, focus and intention, energetic perception and intuitive knowing. We will integrate energy skills into bodywork systems as appropriate.

This seminar is open to all and can be practiced in any setting. It is highly recommended for those in any "touching" profession.

SPACE IS LIMITED! REGISTER SOON.

Place: East Islip, NY. **Dates:** Nov. 19 and 20, 2016, 10A-4P
